

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Required fields are marked with an asterisk (*).

Owner *

 JPallares-TalTECH ▾

Repository name *

/ mi-pagina-web

✓ mi-pagina-web is available.

Great repository names are short and memorable. Need inspiration? How about **crispy-potato** ?

Description (optional)

Repositorio para el primer entregable de los temas 1 y 2

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository

Initialize this repository with:

Add a README file

This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: **None** ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

License: **None** ▾

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

You are creating a public repository in your personal account.

Create repository
